

THE IMPORTANCE OF PROPER WASTE DISPOSAL

Dumping waste can lead to soil and water contamination, which can pose significant health threats to people and wildlife. In many cases, illegally dumped waste could contain dangerous, or even toxic substances. Furthermore, animals can get trapped and tangled in loose garbage, which could lead to fatal injuries. On top of that, the majority of dumped waste is not biodegradable, meaning instead of breaking down it stays wherever it is discarded.

HELP KEEP THE WATERSHED CLEAN

- Properly dispose of your waste. If you are unsure how, check out the Island Waste Management Corporation guidelines
- If you see litter, pick it up and dispose of it.
- Volunteer with us and help conduct a shoreline or roadside clean-up!

Please refer to our social media pages for announcements on volunteering opportunities or email us for more information!
